## THE STORY

# THE SECRID JOURNEY

Ever since our Secrid journey began 20 years ago, we have continued to combine our backgrounds in fashion and product design to create pocket-sized products. Right here in the Netherlands. We are honoured by the awards we have won and perhaps even more by the growth of the number of Secrid fans in the past few years. Today, our products are available in more than 8,000 selected shops worldwide. Together with our three children and almost 100 colleagues, we work in a renovated industrial warehouse: one big family home that serves as a creative centre for new pocket-sized products and services.

We use our business as an *energy* for good.

## 01

### Made in Holland

Our products are entirely produced in Holland (EU), with some materials from Belgium, Germany and Italy.

## 02

### Sheltered workshops

Since our start we have maintained a strong cooperation with sheltered workshops for most of our assembly work.

## 03

### CO<sub>2</sub> compensated

We compensate all our CO<sub>2</sub> emissions since 2009, in close cooperation with Ecochain and FairClimateFund

## 04

### EU leather

Our European cowhides are chosen and produced with utmost care for labour standards and environment.

# SECRID, DUTCH WALLET MAKERS

SINCE 1995

INTRODUCTION

## FOUNDERS' LETTER

Dear partners,

We hope you are doing well and have managed to stay healthy. COVID has changed a lot for everyone, everywhere, and in many ways. As a global brand, we have seen the effects in all 80 countries where we are active. Today, we are happily surprised to notice that many independent businesses have survived this crisis and are remaining positive about the future.

Luckily, we have all manufacturers in Europe close to home, that way we didn't suffer from supply chain troubles, like many other brands experienced in Asia. However, lead times for raw materials have been rising globally. Even for our gift boxes the lead time has multiplied from 3 weeks to 3 months. Our Supply Chain team has been working really hard to cover these types of problems. Not only for carton, but also for aluminium, stainless steel, leather, and all other critical parts.

Moreover, climate change starts to affect daily life and is much more serious than COVID. We are glad that we made the choice to be carbon compensated ever since the launch of our first Cardprotector in 2009, through our cooperation with FairClimateFund. ([secrid.com/en-nl/sustainability](https://secrid.com/en-nl/sustainability)). One of the most efficient ways to save the planet is to design better products, manufactured in a sustainable way. As a Secrid partner, you have first-hand experience with our continuous efforts to optimise the lifespan of our products and our commitment to excellence in design and usability.

At the start of this new year, we present our latest collection updates. After two years of lockdowns, we felt the need to add bright colours, expressing optimism for the summer of 2022. And we focused to find new textured materials that feel nice to the touch, offering consumers a convenient contrast to the overload of digital experiences through touchscreens.

We wish you great business.  
Stay safe and warm regards,  
Marianne & René

# INDUSTRIAL EVOLUTION

It is time to face up to it, we buy too many products. Since the Industrial Revolution, we have exponentially increased our consumerism. Because of that we are now surrounded by more products than ever before. Although we now enjoy a higher standard-of-living than before the Industrial Revolution, this behaviour comes at a huge cost to our planet's ability to sustain us.

The time for change is now. More than ever, we need to slow things down, reset, and radically change the way the industry makes things. Instead of creating more and more poorly-made products with short lifespans, we need to create products which are sustainably produced and become better with each new version with a focus on longevity. Only this way we can turn the Industrial Revolution into *Industrial Evolution*.

# MADE IN HOLLAND

By 2009 the leather industry had practically abandoned the Netherlands in favour of low-income countries. Secrid has brought this industry back to our home country.

By developing a revolutionarily different product and production process, wallets are once again being produced on a large scale in the Netherlands. More efficiently and cleaner than ever, in a quantity never before seen in this tiny country. Close cooperation with our 50 suppliers is therefore very important: from the sewing workshop in Vlaardingen to the sheltered workshop in Leiden. Producing in favourable conditions and with due care for the environment, Secrid has already created more than 200 jobs in the Netherlands.

PHOTO: Made in Holland Vlaardingen, The Netherlands

SOCIALLY RESPONSIBLE

 [seclid.com/en-gb/about/made-in-holland](https://seclid.com/en-gb/about/made-in-holland)

SHELTERED  
WORKSHOPS

Sustainability also means respect for people and society. This is why we choose to work with sheltered workshops. Every day nearly a hundred people assemble our products with enthusiasm and precision in Leiden, Delft and Haarlem.

Together with these colleagues, we are constantly developing the tools and processes to maintain the quality of the product and the working conditions. After all the various components have been assembled, every wallet receives its unique serial number as proof of authenticity.

PHOTO: Sheltered workshop DBZ Leiden, The Netherlands

ENVIRONMENTALLY RESPONSIBLE

 [seclid.com/en-gb/sustainability](https://seclid.com/en-gb/sustainability)

POWDER-  
COATING

Powdercoating is the new step forward in our pursuit of zero waste production. Profiles that we once rejected because of spots or streaks are given a new look with powder coating.

All our profiles are finished with a tough anodising layer that protects the soft aluminium from scratches. Due to the transparent nature of this anodising layer, the profile retains a metallic appearance. Unfortunately, this means that any spots and streaks in the aluminium remain visible. We have always stored profiles that we had to reject for this reason, waiting for a solution. We have now found this in powder coating. This is not only robust, but also opaque. It is an old technique, but after a long period of fine tuning, our supplier succeeded perfectly.

PHOTO: The racks are collected and ready for transport to Paswerk: the sheltered workshop where the profiles are checked one more time before being fitted with the internal mechanism.

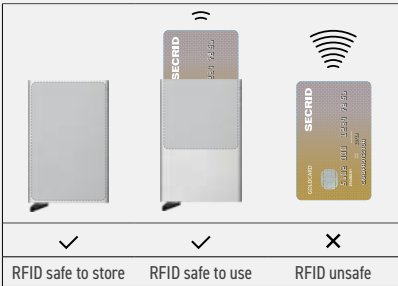

PAYMENT PROTECTION

secrid.com/en-gb/about/protect-your-cards

YOUR  
PRIVACY  
REMAINS  
PROTECTED

The latest generation of bank, travel and ID cards is equipped with RFID (radio-frequency identification) chips and antennas to enable wireless communication.

This is convenient but also comes with risks, as RFID cards can be scanned and skimmed from considerable distances. Theft of personal data and money may occur without being noticed. When these cards are completely inside the Cardprotector, this wireless communication is blocked and the cards are fully protected. When the cards are slid out 30 mm, their wireless signal is weak, but sufficient for communication over a short distance. This way your privacy remains secured in the best possible way.

WALLET REGISTRATION

register.secrd.com

UNIQUE  
SERIAL  
NUMBER

Every Secrid product is given a unique serial number, engraved on the inside of the Cardprotector. This code represents the personal history of each wallet.

Once the new owner decides to register the wallet at [register.secrd.com](https://register.secrd.com), the code is also connected to its user. Registering the product grants a proof of authenticity and a third year of warranty.

# 6 DIFFERENT MODELS

## C CARDPROTECTOR

The heart of our collection and our most minimalist wallet. The aluminium protects your cards against bending, breaking and unwanted wireless communication.

4/6 protected cards	—	—
---------------------------	---	---

63 x 102 x 8 mm

## MB MONEYBAND

Our smallest solution for banknotes, cards and receipts. Made of colourful elastic and stainless steel, the rubber detail on the inside keeps everything firmly in place.

joins 2 cardpro- tectors	+4 extra cards	more space
-----------------------------------	----------------------	---------------

25 mm (height)

## CS CARDSLIDE

A modular wallet consisting of a Cardprotector and a Slide, held together by a Moneyband. The Slide provides extra space to carry business cards, banknotes or any smaller personal items.

4/6 protected cards	+2 extra cards	more space
---------------------------	----------------------	---------------

68 x 103 x 19 mm

## M MINIWALLET

Our most iconic wallet and the perfect all-rounder. The Miniwallet is compact in size and surprisingly large in storage capacity. With a wide variety of styles and colours, it fits every pocket.

4/6 protected cards	+4 extra cards	more space
---------------------------	----------------------	---------------

65 x 102 x 21 mm

## S SLIMWALLET

Carry more with an even slimmer profile. The Slimwallet's leather has a wider cut, while retaining a slim silhouette. This way it fits easily into a front or breast pocket.

4/6 protected cards	+6 extra cards	more space
---------------------------	----------------------	---------------

68 x 102 x 16 mm

## T TWINWALLET

With two Cardprotectors to hold double the content, the Twinwallet carries up to 16 cards, cash and receipts, but remains compact in size.

8/12 protected cards	+4 extra cards	more space
----------------------------	----------------------	---------------

70 x 102 x 25 mm

ALUMINIUM

## THE CARD- PROTECTOR

The aluminium Cardprotector is the heart of our collection and our most minimalist wallet. It has a patented sliding system that gives access to the cards you use most with one simple click. Additionally, the Cardprotector protects your cards against bending, breaking and unwanted wireless reading of RFID and NFC cards. The Cardprotector won the *Red Dot Design Award 2009*.

ALUMINIUM

## THE CARD-PROTECTOR POWDER

### *A new step towards a zero-waste supply chain*

We are constantly looking for solutions with regard to aluminium Cardprotectors with tiny superficial flaws, which are not up to our quality standards. The texture and brightly coloured mechanism make the new Cardprotector Powder a true eye-catcher, and represent another step closer to a zero-waste supply chain. A year of research has resulted in a new powder-coating technique. These functionally excellent Cardprotectors are covered with a new layer of powder coating.

ALUMINIUM

## THE CARD-PROTECTOR LASER

### *Cardprotector engraved with nanolaser*

The front of the Cardprotector is engraved using a nanolaser. The detailed patterns create a beautiful contrast between the processed and the raw aluminium.

POLYCARBONATE AND ELASTIC

## THE CARDSLIDE

### *Extend your possibilities*

The Cardslide consists of a Cardprotector and a Slide, held together by a Moneyband. The Slide provides extra space for business cards, banknotes and any smaller personal items such as a photo, SD card or key. Made of high-quality polycarbonate, as used in bulletproof glass, with slimline touches of stainless steel, it provides optimal protection for your belongings.

LEATHER

# THE INDIGO

## Inspired by denim

A deep natural colour, a binding factor across cultures for more than 1,000 years. Our Indigo leather line is dipped into an indigo dye bath, deepening the colour with each dip, creating rich and vibrant hues. The Indigo<sup>3</sup> and Indigo<sup>5</sup> wallets are dipped 3 and 5 times respectively.

## LEATHER SPECIFICATIONS

VEGETABLE TANNED

# NATURAL BEAUTY

Miniwallet MVg-Rosso-Bordeaux, Slimwallet SVg-Caramello-Sand, Miniwallet MVg-Navy-Silver, Miniwallet MVg-Espresso-Brown

LEATHER

## THE VEGETABLE TANNED

### Natural beauty

La Bretagna is one of only a few tanneries left in Tuscany that employ the traditional technique of vegetable tanning at a high level. They process the hides using leaves, bark and even fruit instead of chemicals. It produces beautiful leather that becomes richer through use.

LEATHER SPECIFICATIONS

- Vegetable-tanned
- European cowhide
- Tanned and finished in Italy
- Cut and stitched in the Netherlands
